NORDIC MUNICIPAL ENGINEERS - THERE WHEN IT MATTERS

At a time when all that matters is being called into question in the Nordic region, the role of the municipal engineers gets the eyes and the attention of the politicians.
We in the Nordic region have the Ukrainian war in our backyard, and we are now joining forces to share issues we are working on.
During the week you will meet municipal engineers who are working on different aspects, enabling the robustness in our countries now, when we are entering a new every day.

Smart energy and sustainable cities: How Lund scales for the future

Jonas Birgersson
Founder & Chairman | ViaEuropa

Markus Paulsson
Energy Strategist | Lund Municipality

Lund is leading the way in local energy transition through bold collaboration and next-generation technology. Join our digital seminar featuring Markus Paulsson and Jonas Birgersson to discover how the city turns climate strategies and energy futures into reality.
Markus will share how CoAction Lund orchestrates cross-sector collaboration between 40+ local actors to accelerate the energy and mobility transition. Jonas will dive into the technical solution, explaining how EnergyNet applies internet logic to power grids to optimize local energy sharing and radically cut grid dependence.

TUE 24TH NOV | FINLAND

City Aviation: Integrating Drones into the Urban Environment

Christina Suomi | Project Director | City of Helsinki

Let´s explore how drones and emerging aviation technologies are becoming part of the urban environment, creating new opportunities and challenges for cities. Drawing on Helsinki's pioneering work in city aviation, we examine how urban planning, municipal infrastructure, digital twins and U-space services can support safe and scalable drone operations – and how cities can take an active role in shaping the future of low-altitude aviation.

WED 25TH NOV | NORWAY

From BIM to Data for Politicans : BIM is for the engineer – the politician needs stories How to create stories with data

Per Ove Akselvoll | Product Owner Politikerdashbordet

The productowner of Per Ove Aksvoll presents Politikerdashbordet, dashboard data from all 357 municipalities in Norway. It is set in scenarios to get the best Life Cycle Cost for the portefolio, but also for each building. The dashboard is open and available for anybody in Norway.

THUR 26TH NOV | ICELAND

Lava Barrier Design and Construction: Resilience Through Robust Simplicity

Hörn Hrafnsdóttir| Water Resources Engineer, M.Sc. | Verkís Consulting Engineers

The presentation addresses the rapid design and construction of lava barriers to protect Grindavík and the Svartsengi Power Plant during Iceland's volcanic crisis. Strong collaboration, real-time risk assessment, and sending 3D models directly to heavy machinery enabled simultaneous design and construction under extreme time pressure, offering key lessons in emergency preparedness and infrastructure resilience.

- All webinars start at 2pm CET, and last an hour
